

Prescribing Information

Emulsiderm™ Emollient

White cutaneous emulsion and bath additive

Benzalkonium chloride 0.5% w/w, liquid paraffin 25% w/w, isopropyl myristate 25% w/w.

Uses: An antimicrobial emollient for use in the treatment of dry skin conditions, such as eczema and ichthyosis.

Directions: For use by adults, children and the elderly.

For use in the bath: Add to a bath of warm water. Soak and pat dry.

For application to the skin: Rub a small amount of undiluted emollient into the dry areas of skin until absorbed.

Contra-indications, warnings, side effects etc: Please refer to SPC for full details before prescribing. Do not use if sensitive to any of the ingredients. In the unlikely event of a reaction, stop treatment. When breast-feeding, if use on the nipples is necessary, apply sparingly and after feeds. Take care not to slip in the bath. Keep away from the eyes.

Instruct patients not to smoke or go near naked flames. Fabric (clothing, bedding, dressings etc) that has been in contact with this product burns more easily and is a potential fire hazard. Washing clothing and bedding may reduce product build-up but not totally remove it.

Package quantity, NHS price and MA number:

300ml bottle £3.85, PL 00173/0036.

Legal category: GSL/ P.

Further information is available from the MA holder: Dermal Laboratories, Tatmore Place, Gosmore, Hitchin, Herts SG4 7QR, UK.

Date of preparation: April 2024.
